Aims and scope
Published monthly, the *International Journal of Dermatology* is specifically designed to provide dermatologists around the world with a regular, up-to-date source of information on all aspects of the diagnosis and management of skin diseases. Accepted articles regularly cover clinical trials; education; morphology; pharmacology and therapeutics; case reports, and reviews. Additional features include tropical medical reports, society news, correspondence, proceedings and transactions, and education.

The *International Journal of Dermatology* is guided by a distinguished, international editorial board and emphasizes a global approach to continuing medical education for physicians and other providers of health care with a specific interest in problems relating to the skin.

The official organ of the **International Society of Dermatology**, *International Journal of Dermatology* is indexed by *Index Medicus* and *Current Contents*.
